

## **DIGITAL SUPPLY CHAIN AND LOGISTICS MANAGEMENT (DSCLM)**

Thessaloniki, Greece

Thessaloniki, 15th April 2019

Dear Olivera Grljević,

It is our pleasure to invite you as a lecturer to participate at *The first international summer school: Digital supply chain and logistics management* organized by Aristotle University of Thessaloniki, the Hellenic Institute of Transport and Texas A&M University. The summer school will be held from 1st to 5th July 2019.

The scope of the summer school is to establish a communication, knowledge-based grid that will advance research in digital supply chains, contribute to the transformation and advancement of supply chain education to all participants, provide students with global research and international leadership experience, and train students on real-world aspects related to digital supply chain management and engineering.

The aim of this five-day summer school is to familiarize graduate students with state-of-the-art advances and trends in digital supply chain including digital infrastructures, digital sourcing, production and transportation management and digital demand management. This course will strive to evaluate current trends, growth opportunities, global patterns and niche markets, within the area of Digital Logistics. In fulfilling these objectives, the course will use a holistic approach, and rely on seminars from expert guest lecturer and practitioners from industrial supporters. The target audience includes graduate students, graduates and junior researchers (MSc, PhD students, postdocs) pursuing careers involving Operations, Business Logistics and Management, or just interested in learning more about new research trends and challenges as well as best business practices in the field.

Kind regards,

Dr. Georgia Aifantopoulou  
Deputy Director
